CDR Contextual Data Resource for Aging Surveys

Documentation for

US Decennial Census and American Community Survey Data

Version 2.0, released September 2020

Jennifer Ailshire, Sarah Mawhorter, and Eun Young Choi

Requested Acknowledgment

If you used the Contextual Data Resource data in a written analysis, please include the following acknowledgement:

> This analysis uses data or information from the Contextual Data Resource (CDR): US Decennial Census and American Community Survey Data, 1990-2018, Version 2.0 as of September 2020, developed by Jennifer Ailshire, Sarah Mawhorter, and Eun Young Choi at the USC/UCLA Center on Biodemography and Population Health, with funding from the National Institute on Aging (R21 AG045625, P30 AG017625).

Suggested Citation

Jennifer Ailshire, Sarah Mawhorter, and Eun Young Choi. 2020. Contextual Data Resource (CDR): US Decennial Census and American Community Survey Data, 1990-2018, Version 2.0. Los Angeles, CA: USC/UCLA Center on Biodemography and Population Health.

Data Sources

US Census Bureau. US Decennial Census and American Community Survey. Prepared by Social Explorer. https://www.socialexplorer.com

Version Note

Version 2.0 updates the 5-year estimates data from the American Community Surveys for 2005-09, 2006-10, 2007-11, 2009-13, 2010-14, 2011-15, 2013-17 and 2014-18. Please note that variable names may be different from the previous version of the data.

Linking CDR Data with Survey Respondent Data

The Contextual Data Resource is designed to be linked with geocoded survey data.
All geographic identifiers are in string format, and match the US Census Bureau geographic identifiers for states, counties, Core-Based Statistical Areas (CBSAs), and census tracts. The county data has been adjusted for county changes since 1990, the CBSA level data is aggregated from county data to constant 2013 CBSA delineations, and the census tract level data has been harmonized to the 2010 census tract boundaries.

- To link state level data, merge using the STFIPS10 geographic identifier, which is the 2-digit state FIPS code.

- To link county level data, merge using the 5-digit STCTYFIPS10 geographic identifier, which is the 2-digit state + 3-digit county FIPS code.

- To link CBSA level data, merge using the 5-digit cbsa13 geographic identifier.

- To link census tract level data, merge using the 11-digit LINKCEN2010 geographic identifier, which is the 2-digit state + 3-digit county + 6-digit census tract FIPS code.

Dataset Overview

The Decennial Census and American Community Survey (ACS) contain demographic and socioeconomic data on the US population and housing. The Census and ACS are collected by the U.S. Census Bureau. The CDR provides Census data for 1990, 2000, and 2010, and ACS data for 2005-09, 2006-10, 2007-11, 2008-12, 2009-13, 2010-14, 2011-15, 2012-16, 2013-17, and 2014-18 at the state, county, Core-Based Statistical Area (CBSA), and census tract levels of analysis. See the variable codebook for details.

Data Summary

Dataset Name: U.S. Decennial Census and American Community Survey

Data Source: U.S. Census Bureau

Data Source URL: www.socialexplorer.com

Data Collection Method: Survey

Years Collected: The Decennial Census is collected every ten years. The American Community Survey is collected annually, and made available in 1-year and 5-year increments depending on geographic level.

Geographic Level of Collection: Household; CDR uses tables provided at the census tract, county, and state levels

Years Available

The CDR includes the 1990, 2000, and 2010 Decennial Census, and the 2005-09, 2006-10, 2007-11, 2008-12, 2009-13, 2010-14, 2011-15, 2012-16, 2013-17, and 2014-18 ACS 5-year data. The 1990 and 2000 censuses include a wide range of demographic, socioeconomic, and housing variables. A much smaller subset of variables is provided in the 2010 census, so the CDR supplements the 2010 census data with ACS data. Data for smaller geographies is only available in aggregated 5-year estimates in the ACS because of a smaller sample size.

Geographies and Interpolation

Census and ACS data are provided at the state, county, Core-based Statistical Area (CBSA), and census tract levels. Because Census and ACS geographic units change over time, the data have been interpolated to recent geographic definitions that are consistent across the 1990, 2000, 2010, 2005-09, 2006-10, 2007-11, 2008-12, 2009-13, 2010-14, 2011-15, 2012-16, 2013-17, and 2014-18 datasets.

State level data elements are provided for the 50 U.S. states and District of Columbia.

- Geographic identifier: STFIPS10 – State FIPS code (2 digits)

County level data elements are adjusted for minor changes that occurred from 1990 onwards.

- Information on changes in county definitions and boundaries is provided at https://www.census.gov/programs-surveys/geography/technical-documentation/county-changes.html.

- Geographic identifier: STCTYFIPS10 – County FIPS code (5 digits: 1-2 state, 3-5 county)

CBSA data elements are aggregated from the adjusted county-level data into the 2013 CBSA delineations created by the US Office of Management and Budget and provided by the US Census Bureau.

- The 2013 CBSA delineations were chosen to match the delineation vintage used in IPUMS microdata.

- For more information on CBSAs, see https://www.census.gov/programs-surveys/metro-micro.html.

- Geographic identifiers: cbsa13 and cbsatitle13 – code (5 digits) and title for 2013 CBSA.

- The variable metmic13 distinguishes Metropolitan from Micropolitan Statistical Areas.

Census tract level data elements are interpolated to 2010 census tract boundaries using code from the Longitudinal Tract Database.

- The Longitudinal Tract Database was developed by John Logan, Zengwang Xu, and Brian Stults. More information and technical documentation is available at https://s4.ad.brown.edu/projects/diversity/researcher/bridging.htm.

- Geographic identifier: LINKCEN2010 – 2010 census tract FIPS code (11 digits: 1-2 state, 3-5 county, 6-11 tract)

GIS shapefiles for Census and ACS geographies are provided by the US Census Bureau at https://www.census.gov/geo/maps-data/data/tiger-line.html.

CDR Data Files

The CDR includes separate data files for each geographic level, type of data, and year so that users can select subsets of the variables provided. Each file is named by geography (state, county, cbsa13, or tract10), type of data file (pct or count), and Census or ACS dataset (1990census, 2000census, 2010census, 200509acs, 200610acs, 200711acs, 200812acs, 200913acs, 201014acs, 201115acs, 201216acs, 201317acs, or 201418acs). For example, the file containing percentages and medians for the 2000 census at the state level is named "state_pct_2000census."

Table 1. Type of CDR Data by Geographical Level and Year

Dataset	State	County	CBSA	Census Tract
Decennial Census				
1990	■	■*	■†	■‡
2000	■	■*	■†	■‡
2010	■	■*	■†	■‡

2012-16, 5yr	■	■	■†	■
2013-17, 5yr	■	■	■†	■
2014-18, 5yr	■	■	■†	■

Interpolated to current county boundaries (see note above).

†*Aggregated from interpolated county data to 2013 CBSA boundaries (see note above).*

‡*Interpolated to 2010 Census Tract boundaries (see note above).*

- **Pct** files include percentage and median variables calculated from counts. These variables can be used as-is for analysis. Percentage and median variables can be combined across multiple years of data to calculate changes over time.

- **Count** files include the counts of persons, households, or housing units from the original data tables used to calculate percentages and medians. These underlying counts are available so that users can construct their own variables. For example, population totals from the 2000 and 2010 datasets could be combined to calculate population change over that time period.

CDR Variables Included

The CDR provides a range of commonly-used demographic, socioeconomic, and housing variables constructed from Census and ACS tables. As much as possible, variables are consistent across all datasets.

- Demographic information includes age, race and ethnicity, immigration, language use, and linguistic isolation.

- Socioeconomic characteristics include educational attainment, labor force participation, unemployment, occupation, industry, transportation mode, public assistance income, poverty for families with children, poverty for population, and household income.

- Household-related factors include living alone, living in nursing home, and female-headed households with children.

- Housing variables include housing tenure, housing vacancy, persons per room, structure type, housing year built, year moved for owners and renters, house value, house value for specified owner-occupied housing units, and gross rent.

CDR Variable Notes

- All dollar values are adjusted for inflation to 2018 US dollars using CPI-U-RS (Consumer Price Index Research Series Using Current Methods) developed by the Bureau of Labor Statistics. More information can be found at https://www.bls.gov/cpi/research-series/home.htm.

- The original ACS tables include associated margins of error for use in statistical testing. (For more information on ACS margins of error, refer to the technical documentation under *Code Lists, Definitions, and Accuracy > Instructions for Applying Statistical Testing* at https://www.census.gov/programs-surveys/acs/technical-documentation/code-lists.html.) Since many of the ACS variables provided in the CDR are calculated by adding together multiple categories from a table, and interpolated to account for changes in counties over time, it is not practical to provide the margins of error for the ACS CDR variables. For researchers who require margins of error for statistical analysis, unprocessed tabular data and the corresponding error files are available on request.

- Median household income, house value, and gross rent variables from the original Census and ACS estimates are not available in the CDR at the county or CBSA levels because the adjustments for county changes and aggregation into CBSAs would not produce accurate interpolated medians. As an alternate measure, the CDR includes estimated medians for household income, house value, and gross rent calculated from the adjusted and aggregated count data.

- Census 1990 does not include data on house values for all owner-occupied housing units; instead it includes house values for specified owner-occupied housing units. Census 2000 includes house values for both specified and all owner-occupied housing units. All ACS datasets include house values for all but not specified owner-occupied units. For more information on the difference between the two definitions, see the Census 2000 codebook.

Variable List

Name	Definition	Type

Geographic Identifiers

Name	Definition	Type
STFIPS10	State FIPS code (2 digits)	geoid
STCTYFIPS10	County FIPS code (5 digits: 1-2 state, 3-5 county)	geoid
LINKCEN2010	2010 Census Tract FIPS code (11 digits: 1-2 state, 3-5 county, 6-11 tract)	geoid
NAME	Area Name-Legal/Statistical Area Description (LSAD)	geoid
cbsa13	Code for 2013 Core-Based Statistical Areas	geoid
cbsatitle13	Title for 2013 Core-Based Statistical Areas	geoid
metmic13	1 = Metropolitan Statistical Area; 2 = Micropolitan Statistical Area	geoid

Total Population

Name	Definition	Type
pop	Total population	count

Source Tables: *Census 1990: P1; Census 2000: P12; Census 2010: P1; ACS 2005–09 through ACS 2014–18: B01001*

Land Area and Population Density

Name	Definition	Type
areal	Land area in square miles	count

Source Table: *Social Explorer T4*

Name	Definition	Type
popden	Population density per square mile	percent

Source Tables: *Census 1990: P1; Census 2000: P12; Census 2010: P1; ACS 2005–09 through ACS 2014–18: B01001*

Sex

Name	Definition	Type
popm	Male	count
popf	Female	count
ppopm	Percent male	percent
ppopf	Percent female	percent

Source Tables: *Census 1990: P5; Census 2000 & Census 2010: P12; ACS 2005–09 through ACS 2014–18: B01001*

Age

agedn	Total population (denominator for age counts)	count
agele17	Aged under 18	count
age1864	Aged 18 to 64	count
agege65	Aged 65 and over	count
agege65m	Males aged 65 and over	count
agege65f	Females aged 65 and over	count
pagele17	Percent aged under 18	percent
page1864	Percent aged 18 to 64	percent
pagege65	Percent aged 65 and over	percent

Source Tables: *Census 1990: P11; Census 2000 & Census 2010: P12; ACS 2005–09 through ACS 2014–18: B01001*

Note: No data available in Census 1990 or 2010 for males and females aged 65 and over.

Race and Ethnicity

redn	Total population (denominator for race and ethnicity counts)	count
renhw	Non-Hispanic White population	count
reblk	Non-Hispanic Black population	count
reapi	Non-Hispanic Asian and Pacific Islander population	count
reoth	Non-Hispanic other race population	count
rehsp	Hispanic or Latino population	count
prenhw	Percent Non-Hispanic White	percent
preblk	Percent Non-Hispanic Black	percent
preapi	Percent Non-Hispanic Asian and Pacific Islander	percent
preoth	Percent Non-Hispanic other race	percent
prehsp	Percent Hispanic or Latino	percent

Source Tables: *Census 1990: P10; Census 2000: P8; Census 2010: P5; ACS 2005–09 through ACS 2014–18: B03002*

Foreign Born

fbdn	Total population (denominator for foreign born counts)	count
fb	Foreign born population	count
pfb	Percent foreign born	percent

Source Tables: *Census 1990: P36, P42; Census 2000: P21; Census 2010: none; ACS 2005–09 through ACS 2014–18: B05002*

English Language

endn	Population aged 5+ (denominator for English language counts)	count
endns	Population aged 65+ (denominator for English language counts)	count
enhm	Speak only English at home	count
enhms	Population aged 65+ speak only English at home	count
envw	Speak other language at home; speak English very well	count
envws	Population aged 65+ speak other language at home; speak English very well	count
enwl	Speak other language at home; speak English well	count
enwls	Population aged 65+ speak other language at home; speak English well	count
ennw	Speak other language at home; speak English not well	count
ennws	Population aged 65+ speak other language at home; speak English not well	count
enno	Speak other language at home; speak English not at all	count
ennos	Population aged 65+ speak other language at home; speak English not at all	count
penhm	Percent speak only English at home	percent
penhms	Percent population aged 65+ speak only English at home	percent
pen	Percent speak English well or better	percent
pens	Percent population aged 65+ speak English well or better	percent

Source Tables: *Census 1990: P28; Census 2000: P19; Census 2010: none; ACS 2005–09 through ACS 2014–18: B16004*

Linguistic Isolation

lidn	Households (denominator for linguistic isolation counts)	count
li	Linguistically isolated households	count
pli	Percent linguistically isolated households	percent

Source Tables: *Census 1990: P29; Census 2000: P20; Census 2010: none; ACS 2005–09 through ACS 2014–18: B16002*

Educational Attainment

eddn	Population aged 25+ (denominator for education counts)	count
edlt	Without high school degree aged 25+	count
edhs	High school graduates without college degree aged 25+	count
edba	College graduates aged 25+	count
pedlt	Percent without high school degree of population aged 25+	percent
pedhs	Percent high school graduates without college degree of population aged 25+	percent
pedba	Percent college graduates of population aged 25+	percent

Source Tables: *Census 1990: P57; Census 2000: P37; Census 2010: none; ACS 2005–09 through ACS 2007–11: A12001; ACS 2008–12 through ACS 2014–18: B15003*

Labor Force Participation

lfdn	Population aged 16+ (denominator for labor force counts)	count
lf	In labor force aged 16+	count
plf	Labor force participation rate	percent

Source Tables: *Census 1990: P70; Census 2000: P43; Census 2010: none; ACS 2005–09 through ACS 2007–11: A17002; ACS 2008–12 through ACS 2014–18: B23025*

Unemployment

lfcv	In civilian labor force, aged 16+	count
unem	Unemployed in civilian labor force, aged 16+	count
punem	Unemployment rate	percent

Source Tables: *Census 1990: P70; Census 2000: P43; Census 2010: none; ACS 2005–09 through ACS 2007–11: A17002; ACS 2008–12 through ACS 2014–18: B23025*

Occupation

ocdn	Employed civilian population aged 16+	count
ocmp	Employed in management, professional, and related occupations	count
pocmp	Percent employed in management, professional, and related occupations	percent

Source Tables: *Census 1990: P78; Census 2000: P50; Census 2010: none; ACS 2005–09 through ACS 2014–18: C24010*

Industry

indn	Employed civilian population aged 16+	count
inma	Employed in manufacturing industry	count
pinma	Percent employed in manufacturing industry	percent

Source Tables: *Census 1990: P77; Census 2000: P49; Census 2010: none; ACS 2005–09 through ACS 2014–18: C24030*

Public Assistance Income

hpasdn	Households (denominator for public assistance counts)	count
hpas	Households with public assistance income	count
phpas	Percent households with public assistance income	percent

Source Tables: *Census 1990: P95; Census 2000: P64; Census 2010: none; ACS 2005–09 through ACS 2014–18: B19057*

Female-Headed Households with Children

fhhcdn	Families (denominator for female-headed households with children counts)	count
fhhc	Families with female householder and own children under 18 years	count
pfhhc	Percent female-headed households with children	percent

Source Tables: *Census 1990: P19; Census 2000: P15; Census 2010: none; ACS 2005–09 through ACS 2014–18: B11003*

Poverty for Families with Children

fvdn	Families (denominator for children in poverty counts)	count
fvwc	Families with children and income below poverty level	count
pfvwc	Percent families with children and in poverty	percent

Source Tables: *Census 1990: P123; Census 2000: P90; Census 2010: none; ACS 2005–09 through ACS 2014–18: B17010*

Poverty for Population

pvdn	Population for whom poverty status is determined	count
pv	Population for whom poverty status is determined: Income below poverty level	count
pvdns	Population aged 65+ for whom poverty status is determined	count
pvs	Pop aged 65+ for whom poverty status is determined: Income below poverty level	count
ppv	Percent population in poverty	percent
ppvs	Percent population aged 65+ in poverty	percent

Source Tables: *Census 1990: P117; Census 2000: P87; Census 2010: none; ACS 2005–09 through ACS 2014–18: B17001*

<u>Living Alone</u>

h1dn	Total population (denominator for living alone counts)	count
h1	Living alone	count
h1dns	Population aged 65+ (denominator for living alone counts)	count
h1s	Population aged 65+ living alone	count
h1sm	Males aged 65+ living alone	count
h1sf	Females aged 65+ living alone	count
ph1	Percent living alone	percent
ph1s	Percent of population aged 65+ living alone	percent
ph1sm	Percent of males aged 65+ living alone	percent
ph1sf	Percent of females aged 65+ living alone	percent

Source Tables: Census 1990: P17, P18; Census 2000: P9, P11; Census 2010: P18, P25; ACS 2005–09 through ACS 2007–11: B09016, B09017; ACS 2008–12 through ACS 2014–18: B09019, B09020

Note: No data available in Census 1990 or 2010 for males and females aged 65 and over living alone.

<u>Living in Nursing Homes</u>

nh	Persons in group quarters: Institutionalized persons: Nursing homes	count
nhs	Population in group quarters: aged 65+: Institutionalized: Nursing homes	count
pnh	Percent living in nursing homes	percent
pnhs	Percent of population aged 65+ living in nursing homes	percent

Source Tables: Census 1990: P28, none for pop aged 65+; Census 2000: P37, P38; Census 2010: P42, P43; ACS 2005–09 through ACS 2014–18: none

Transportation Mode

trdn	Workers aged 16+ (denominator for commute mode counts)	count
trdr	Workers aged 16+: Car, truck, or van: Drove alone	count
trpt	Workers aged 16+: Public transportation	count
trwb	Workers aged 16+: Bicycle & walked	count
trpb	Workers aged 16+: Public transportation, bicycle & walked	count
ptrdr	Percent drove alone to work	percent
ptrpt	Percent took public transportation to work	percent
ptrwb	Percent walked or bicycled to work	percent
ptrpb	Percent took public transportation, walked, or bicycled to work	percent

Source Tables: Census 1990: P49; Census 2000: P30; Census 2010: none; ACS 2005-09 through ACS 2014-18: B08301

Housing Tenure

hhr	Households (denominator for tenure counts)	count
own	Owners	count
rnt	Renters	count
pown	Percent homeowners	percent

Source Tables: Census 1990: H8; Census 2000 & Census 2010: H4; ACS 2005-09 through ACS 2014-18: B25003

Housing Vacancy

vac	Vacant housing units	count
vacr	Vacant for rent	count
vaco	Vacant for sale only	count
pvac	Percent vacant housing units	percent
pvacr	Percent vacant for rent	percent
pvaco	Percent vacant for sale	percent

Source Tables: Census 1990: H6; Census 2000 & Census 2010: H5; ACS 2005-09 through ACS 2014-18: B25004

Single Family Homes

sfdn	Housing Units (denominator for single-family homes counts)	count
sf	Housing Units: 1, Detached	count
psf	Percent single-family homes	percent

Source Tables: *Census 1990: H20; Census 2000: H30; Census 2010: none; ACS 2005-09 through ACS 2014-18: B25024*

Persons Per Room

prdn	Households (denominator for persons per room counts)	count
prgt1	Households with more than one person per room	count
pprgt1	Percent households with more than one person per room	percent

Source Tables: *Census 1990: H21; Census 2000: H20; Census 2010: none; ACS 2005-09 through ACS 2014-18: B25014*

Housing Year Built

hbdn	Housing units (denominator for housing year built counts)	count
hbbf60	Housing units built before 1960 (Census 1990)	count
hb6079	Housing units built 1960 to 1979 (Census 1990)	count
hb80la	Housing units built 1980 or later (Census 1990)	count
phbbf60	Percent housing units built before 1960 (Census 1990)	percent
phb6079	Percent housing units built 1960 to 1979 (Census 1990)	percent
phb80la	Percent housing units built 1980 or later (Census 1990)	percent

Source Tables: *Census 1990: H25*

Housing Year Built (continued)

hbbf70	Housing units built before 1970 (Census 2000)	count
hb7089	Housing units built 1970 to 1989 (Census 2000)	count
hb90la	Housing units built 1990 or later (Census 2000)	count
phbbf70	Percent housing units built before 1970 (Census 2000)	percent
phb7089	Percent housing units built 1970 to 1989 (Census 2000)	percent
phb90la	Percent housing units built 1990 or later (Census 2000)	percent

Source Tables: *Census 2000: H34*

hbbf80	Housing units built before 1980 (ACS 2005-09 through ACS 2010-14)	count
hb8099	Housing units built 1980 to 1999 (ACS 2005-09 through ACS 2010-14)	count
hb00la0509	Housing units built 2000 or later (ACS 2005-09 through ACS 2010-14)	count
phbbf80	Percent housing units built before 1980 (ACS 2005-09 through ACS 2010-14)	percent
phb8099	Percent housing units built 1980 to 1999 (ACS 2005-09 through ACS 2010-14)	percent
phb00la	Percent housing units built 2000 or later (ACS 2005-09 through ACS 2010-14)	percent

Source Tables: *ACS 2005–09 through ACS 2010–14: B25034*

hbbf90	Housing units built before 1990 (ACS 2011-15 through ACS 2014-18)	count
hb9009	Housing units built 1990 to 2009 (ACS 2011-15 through ACS 2014-18)	
hb10la	Housing units built 2010 or later (ACS 2011-15 through ACS 2014-18)	count

mhval	Median house value, inflation-adjusted 2018 dollars	median
emhval	Median house value, inflation-adjusted 2018 dollars (estimated from counts)	median

Source Tables: Census 1990: none; Census 2000: H84, H85; Census 2010: none; ACS 2005–09
through ACS 2014–18: B25075, B25077

Note: Census 1990 does not include data on house values for all owner-occupied housing units; instead it includes house values for specified owner-occupied housing units. Census 2000 includes house values for both specified and all owner-occupied housing units. ACS 2008-12 includes house values for all but not specified owner-occupied units. For more information on the difference between the two definitions, see the Census 2000 codebook.

Note: The original median house value variable is not available for counties and CBSAs in Census 1990 and Census 2000 because of the interpolation of changing county boundaries over time, as well as the aggregation of multiple counties to form CBSAs. To provide a measure of median house value in those geographies, we added an estimate of the median calculated from the count data by finding the position of the median owner-occupied house within the dollar value brackets.

House Value for Specified Owner-Occupied Housing Units

vsp _all	Owner-occupied housing units	count
