

# **TRANSFORMING THE LONG-TERM CARE INDUSTRY RESEARCH PROJECT**

We're conducting a study of the long-term care industry that will help create a care infrastructure that works for all of us. **We're surveying workers, employers of caregivers and personal attendants, long-term care facility residents, and their families all across California.**

## **Can you take our survey and spread the word?**

**Why:** We want to transform the long-term care industry to better serve both workers and those needing long-term services and supports, and to understand the choices that Californians are making about supporting themselves or a loved one with personal care needs.

### **The details**

**Consumers:** To be eligible, you must hire a homecare worker for yourself or a relative, or manage the care of a relative living in a residential care facility with six beds or less. The person for whom you are coordinating care must live in California, and you cannot hire through IHSS or Regional Centers.

**Workers:** To be eligible, you must work for private agencies, private individuals, or at a small residential care facility in California. If you are only employed through IHSS, you are not eligible.

All who complete the survey will receive a \$10 Target gift card.

**To take the survey for workers, go to [bit.ly/CAREWORK](https://bit.ly/CAREWORK)**

**To take the survey for those who hire caregivers/attendants, go to [bit.ly/LTSS-SURVEY](https://bit.ly/LTSS-SURVEY)**
